

Title, use Times New Roman 16 bold, centered

"Author's name 1"¹, "Author's name 2"², "Author's name 3"³

¹Organization name with short address. ²Organization name with short address. ³ Organization name with short address.

Introduction

All persons wishing to present a paper at the International Symposium CEESC must prepare a camera-ready 2-page extended abstract using Word according to the format described herein. The Scientific Committee will review the abstracts and those accepted will be organized in either oral or poster topical sessions.

Based on these abstracts alone, the Program Committee will select oral presentations and poster presentations.

Results and Discussion

Underline the name of the corresponding author. Use superscript arabic numbers to refer to the affiliation of each author. Employ short addresses for your organizations in order to have a maximum of 8 rows for the title of your abstract, the author's names and the affiliations.

Upon receipt, the abstract will be printed and checked for format consistency. If there are any problems, the abstract will be returned for correction. The Program Committee will not re-format or edit abstracts.

Paper. Please keep the Paper Size as A4.

Font size. Please use 12-point Times New Roman font or equivalent throughout the abstract, with single line spacing and justified text. A blank line should separate sections.

References should be in 10-point font. Please use the Applied Catalysis reference style, as in: 1. M.A. Peña, J.P. Gomez, J.L.G.Fierro, *Appl. Catal A.*, 144(1-2) (1996) 7.

Length. The maximum length of the abstract is two pages.

Tables, Figures and Equations. These must fit within the 2-page limit. All lettering must be at least 12-point font size, including captions and legends. Increase the size of the lettering in the figures so they be legible after reduction. Please save pictures in JPEG format before inserting them in the document using the command Insert/Image/From File. That will help in keeping the size of the file low and will decrease the transfer time during submittal.
